

Be A Donor Be A Hero

Ms.Shweta Yadav (BHMS III)

It's a vast topic can't be narrated by using few words. We always read or hear to donate organs and often most of the time, not only illiterate but the literate society also had a great fear to do this. We just listen it & make misuse of our both ears, by listening with one ear & removing it by other. What we mean by DONOR ? is a person who give to a good causes.

'LIFE' is very precious. Everyone loves their existence. We often listen to spread life. Spreading life widely against death. Everyone wants to be HERO, everyone wants to be admired for their courage or actions. So, the action of being donating the organ will lead to be a HERO. After donating, life goes on. The need is being fulfilled for their existence. As water, plastic is being recycled, so they should not be waste then why not life ?

If we want to be a winner of Human Race, we should be able to make our heart emotions so strong that the consent for donation should be easily made. Our old thought and many religious terms and conditions, customs, rituals may form into crisis or hurdles for Organ donation. I don't want to hurt any religious trends but it is a firm belief that In the next time i.e.punarjanam, we will lack that organ what is being donated in this life span. It is believed that the body is god's gifted and we should return it as it is. But imagine, the same circumstance or situation where you need or your dear one needs but there is no donor. And your or your dear ones life goes in vain.

If all the world thinks like that then there will be no survival. We see this god gifted nature and beautiful scenery by our eyes. After our death, who knows about the next life of existence but by donating it the other can enjoy his existence. His black and white life will be colorful.

Don't behave like a Monster , Life teaches us only one thing. Even nature's says that Giving is the best policy without asking in return. Then why should we ask everything in return. LIFE is a never ending bottle of making your good deeds better and also trying to be better by donating even after the death. LIFE is like spring, who nurtures soul's green sprouts. Encourages and leads them but what after the death.

Donating Organ is a fearsome word, even dreadful as a drawn sword but it's a task we are supposed to bear with a smile where one's can freely employ their existence by our small contribution. After death, our organs either be buried or burned as per our religious funeral but it can be used by other one and helps themselves for recovery of their health.

Don't go away by deserting the needy one. We are often taught by the thought of Giving. We often come across that if we give one, he (God) gives us hundred.

LET YOUR FAITH, BE BIGGER THAN YOUR FEAR. The fear of being losing one individual is more dreadful but the faith of being recurred is like a warrior VICTORY. LIFE is so big and strong, you of years or more. And you're not died even after you are funeraled. Life goes on and on. No one can deny

your existence. Lessons of bright colors and a happy atmosphere will be as a gift from your side to a little who just peeped out by your gift.

“The earth had enough resources for men’s need but not for men’s greed”, is what one of India’s greatest visionary MAHATMA GANDHI had to say. Our human race is becoming greedy. Today’s individual is not hearing the sorrow of the others. As for as individuals are concerned, a very important task where each one make difference in the matter of a civic consciousness is saying YES to Organ donation. It can certainly be one way of fighting the huge waves of death ocean which is life threatening.

THE ABRUPT AND THE INVETABLE. It ended as suddenly as it had started. A silence descended on the town; a graveyard silence, a mournful silence hung in the air-as if in memory of the death! A split had appeared on the earth’s surface & once again, this slightly larger & yet again, this as a yawning abyss opened up & swallowed what was left of the derelict town. Only your donated organ will not be the burial of little sleepy town.

“ORGAN DONATION” is when a person allows an organ of theirs to be removed, legally, either by consent while the donor is alive or after death with the assent of the next of kin. DONATION may be for research, or , more commonly healthy transplantable organs and tissues may be donated to be transplanted into another person.”

Now, I will end my essay by the poem with a feeling of person who has survived back & return as a warrior from the death bottle. The one who donates the organ is the Winner of the HUMAN RACE.....

My Life...After a death battle....

I open my eyes..... Ah!

The joy of a new day....

No Matter what comes along.....

My happiness will stay,

I take a deep breath....

I am glad, I am alive,

The rest of the day is bonus.....

No matter how hard I strive....

I will walk for a walk.....

Mo matter what weather

I will walk in the fields

Smell the grass and the heather,

I know I am a winner.....

Who win a life after death.....

I see in the right vein,

To me all of life.

Is joy a gain and again.

My work is just a game I like to play

I love the hunt...

The Chase....

The fray....

I welcome the challenge..

I'm a smiling & think & new thought

To BE A DONOR AND BE A HERO...
